The first part of the paper describes the data used in the study, the second part presents the results of the analysis, and the third part discusses the implications of the findings. The paper concludes with a summary of the main findings and a list of references.

Click on the icon to the right of the question number to view the question.

The first part of the paper describes the development of the instrument and the results of the pilot study. The second part presents the results of the main study, which was conducted in 2010. The third part discusses the implications of the findings for the development of a national curriculum for mathematics in primary schools. The fourth part concludes the paper.
